. FRONT ELEVATION

. BACK ELEVATION

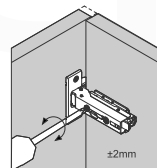

. TOP ELEVATION

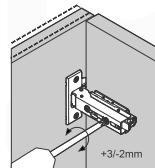

. Adjustments

The options for height adjustment depend on the type of base plate. All adjustments can be made independent of one another.

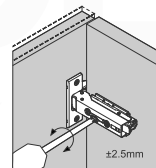

For depth adjustment, select base plates have worm gear adjustment access through the hinge arm.

Side adjustment

Depth adjustment via worm gear

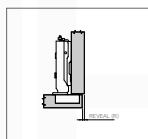

Height adjustment via base plate

. Reveal

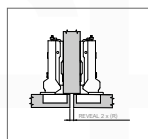

The reveal (R) is the distance required between two doors or between the door and side wall of the cabinet to allow sufficient space for opening the door. The required reveal width (R) depends on the thickness of the door.

Most cabinet makers prefer a reveal (R) of between 3mm and 6mm.

How to Install a Bliss Wall-Hung Vanity INSTALLATION GUIDE

Tools Required for Assembly

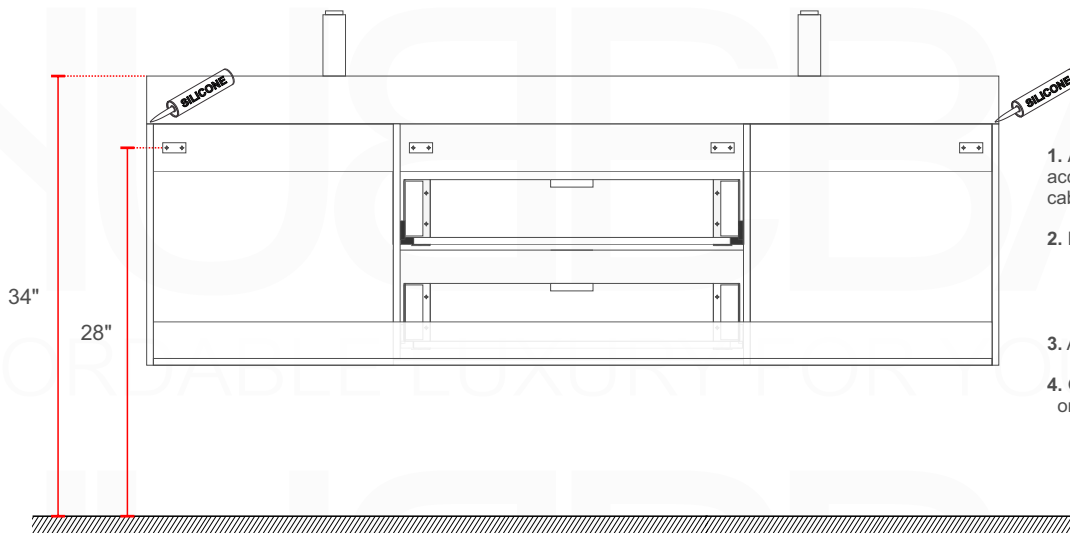

Wall Preparation

Install 2"x6" lumber between the wall studs. Suggested distance from finished floor will be 28" to the center from the floor if the desired finished height of the Vanity is 34" from the floor to the top of the finished countertop.

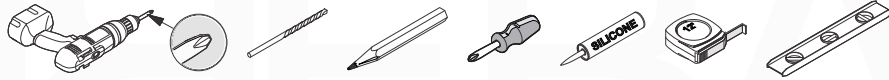

Vanity Installation

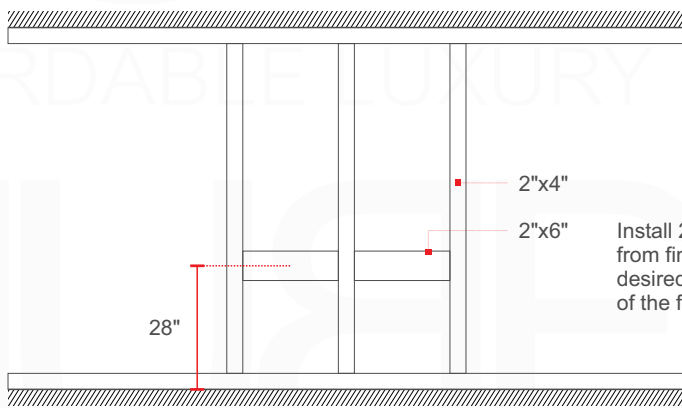

1. Align and level mounting Brackets according to horizontally reinforcement lumber and desired cabinet height.
2. Mount Vanity on to the wall brackets.
3. Add a dap of silicone to the corners of the Cabinet.
4. Gently position and align Counter top Sink onto Vanity.

How to Install a Bliss 72" and 80" Wall-Hung Vanity INSTALLATION GUIDE

Tools Required for Assembly

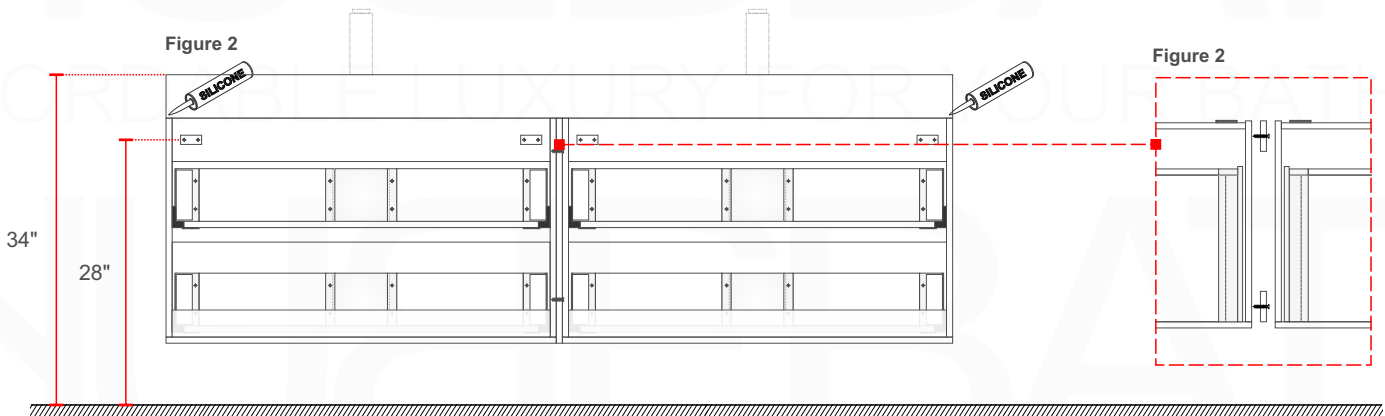

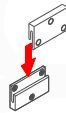

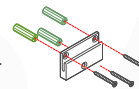

Wall Preparation

Install 2"x6" lumber between the wall studs. Suggested distance from finished floor will be 28" to the center from the floor if the desired finished height of the Vanity is 34" from the floor to the top of the finished Counter Top.

Vanity Installation

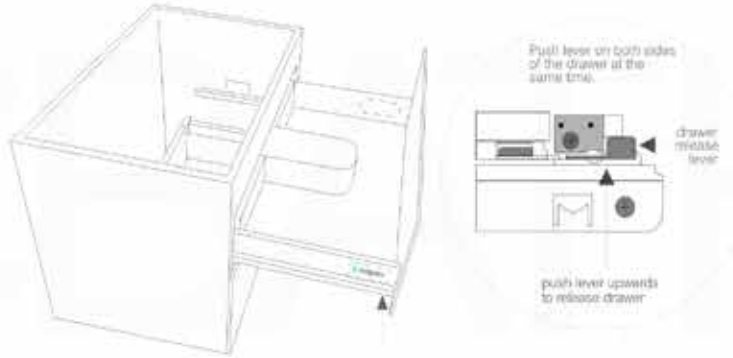

1. Remove all Drawers from the Cabinet sections.
2. Install matching wood spacers provided on one section of the vanity. Please ensure that the front spacer is installed flush with the Cabinet edge, not the drawers. **(See Figure 1)**
Use screws to attach the wood spacers to the cabinet
3. Align and level mounting Brackets according to horizontally reinforcement lumber and desired cabinet height.
4. Mount Vanity on to the wall brackets.
5. Add a dap of silicone to the corners of the Cabinet **(See Figure 2)**
6. Gently position and align Counter Top Sink onto Vanity.

Vanity cabinet | removing+adjusting drawers

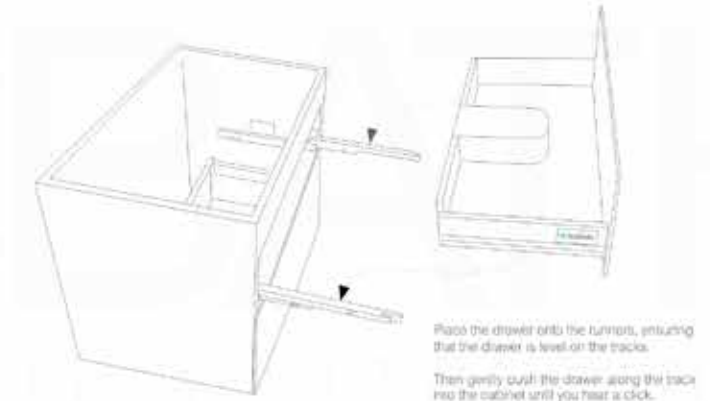

To remove the drawer/s

- * Extend the drawer
- * Look for the release levers **under the drawer, on the sliding bar**
- * To release and remove drawer, simultaneously **push the drawer release levers upwards** (both sides at the same time) and slide/lift the drawer away from the tracks.
- * Repeat for each drawer

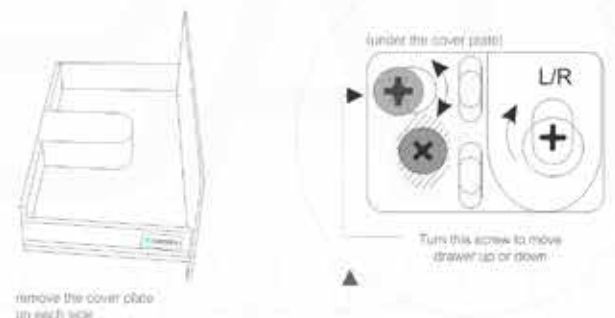

To replace the drawer/s

- * Fully extend the drawer runner on each side of the cabinet
- * Place the drawer onto the runners ensuring that the drawer is levelled on the tracks, and continue to hold in place (otherwise, the drawer will fall).
- * Keeping the drawer levelled, gently push the drawer along the runners into the cabinet until you hear a click.

To adjust the drawer/s

- * To move the drawer up or down, turn the side screw located under the cover plate on each side of the drawer.

These instructions show a vanity cabinet with two drawers. However, the instructions apply to all cabinets and all sizes of the Bliss Vanity Line. The characteristics and drawer mechanisms are the same for all units.

How to Install a Bliss Freestanding Vanity & Remove / Install Drawers INSTALLATION GUIDE

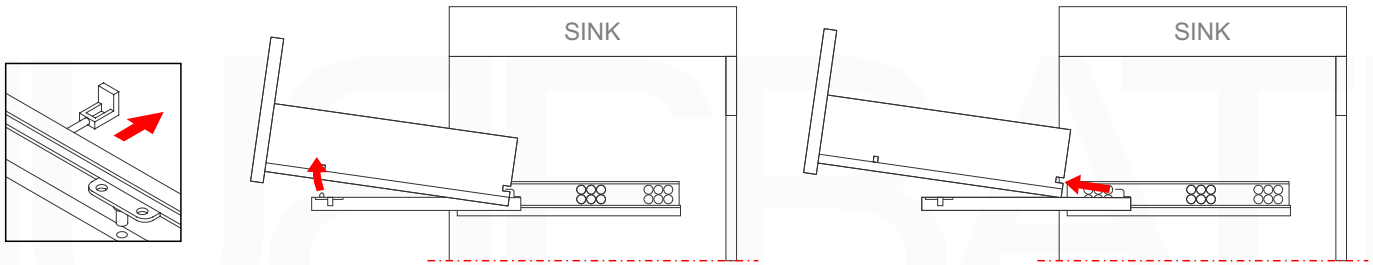

1. Determine your vanity placement and mark the area on the wall where it will be installed.
2. Locate and mark the location of the studs to which you will fasten your vanity. You can find studs by listening for a solid sound as you knock on the wall or by using a stud finder.
3. If your vanity cabinet has a solid back, mark and drill holes to accommodate drain pipes and supply pipes as necessary.
4. Place the vanity in the installation location. Verify that the vanity cabinet is level. If the vanity is not level, use vanity feet (if included) or wooden shims to adjust as necessary.
5. Attach the vanity to the wall by screwing through the mounting rail in the back of the vanity cabinet into the wall studs.
6. Install the integral sink/vanity top by applying a dot of silicone sealant on the corners of the vanity. Position the vanity top onto the vanity and press firmly into place. Wipe away any excess sealant with a damp cloth.

Note: We recommend consulting professional help if you are unfamiliar with installing bathroom vanities and/or plumbing.

How to Install a Bosco Vanity | Remove / Install Drawers | Adjust Doors INSTALLATION GUIDE

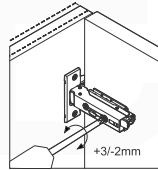

1. Determine your vanity placement and mark the area on the wall where it will be installed.
2. Locate and mark the location of the studs to which you will fasten your vanity. You can find studs by listening for a solid sound as you knock on the wall or by using a stud finder.
3. If your vanity cabinet has a solid back, mark and drill holes to accommodate drain pipes and supply pipes as necessary.
4. Mark the location of each of the wall mounting plates ensuring that they are positioned inside the sidewalls of the vanity unit. 
5. Place the vanity in the installation location. Verify that the vanity cabinet is level. If the vanity is not level, use vanity feet (if included) or wooden shims to adjust as necessary.
6. Install the integral sink/vanity top by applying a dot of silicone sealant on the corners of the vanity. Position the vanity top onto the vanity and press firmly into place. Wipe away any excess sealant with a damp cloth.

How to Install a De Lusso Vanity INSTALLATION GUIDE

1. Determine your vanity placement and mark the area on the wall where it will be installed.
2. Install 2"x6" lumber between the wall studs, behind the drywall. Suggested distance from finished floor will be 28.5" to the center of the floor if the desired finished height of the Vanity is 35.5" from the floor to the top of the finished countertop.
3. If your vanity cabinet has a solid back, mark and drill holes to accommodate drain pipes and supply pipes as necessary.
4. Mark the location of each of the wall mounting plates ensuring that they are positioned inside the sidewalls of the vanity unit.
5. Place the vanity in the installation location. Verify that the vanity cabinet is level.
6. Install the integral sink/vanity top by applying a dot of silicone sealant on the corners of the vanity. Position the vanity top onto the vanity and press firmly into place. Wipe away any excess sealant with a damp cloth.

Note: We recommend consulting professional help if you are unfamiliar with installing bathroom vanities and/or plumbing.

How to Install a Divario Vanity | Remove / Install Drawers | Adjust Doors

INSTALLATION GUIDE

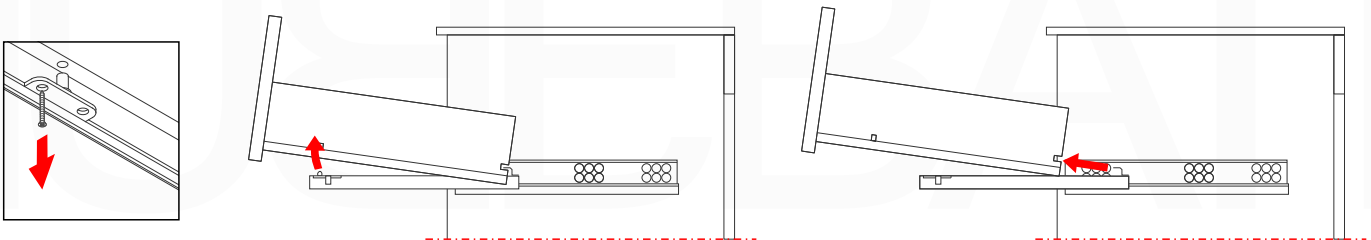

1. Determine your vanity placement and mark the area on the wall where it will be installed.
2. Install 2"x6" lumber between the wall studs, behind the drywall. Suggested distance from finished floor will be 27.5" to the center from the floor if the desired finished height of the Vanity is 34" from the floor to the top of the finished countertop.
3. If your vanity cabinet has a solid back, mark and drill holes to accommodate drain pipes and supply pipes as necessary.
4. Mark the location of each of the wall mounting plates ensuring that they are positioned inside the sidewalls of the vanity unit.
5. Place the vanity in the installation location. Verify that the vanity cabinet is level.
6. Install the integral sink/vanity top by applying a dot of silicone sealant on the corners of the vanity. Position the vanity top onto the vanity and press firmly into place. Wipe away any excess sealant with a damp cloth.

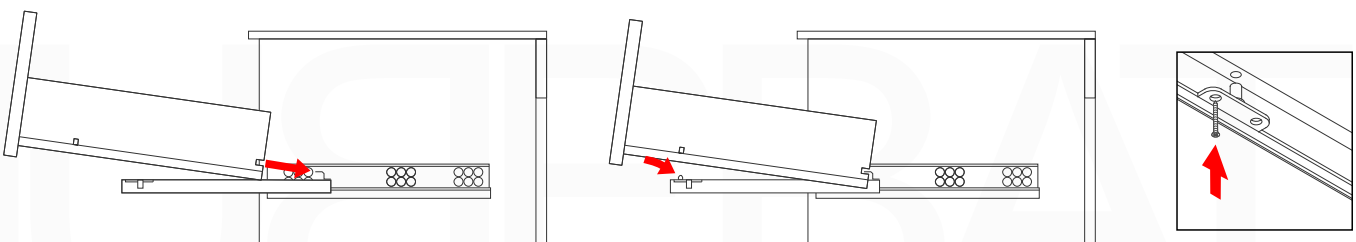

Note: We recommend consulting professional help if you are unfamiliar with installing bathroom vanities and/or plumbing.

Milano 60" Double Sink- KFM60D freestanding bathroom vanity

Minimalists are drawn to Milano, a no-fuss Vanity with panache that goes beyond its simple presence. Though its silhouette is spare, the high-gloss finish and aluminum kickboard provide just enough wow factor. The integrated Push-Open sliders ensure all drawers and door glide open and shut with little effort every time. The Milano Vanity features one door and six fully functional drawers and a crisp white acrylic composite countertop with integrated sink.

How to Install a Milano Vanity | Remove / Install Drawers | Adjust Doors

INSTALLATION GUIDE

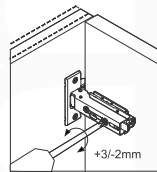

1. Determine your vanity placement and mark the area on the wall where it will be installed.
2. Locate and mark the location of the studs to which you will fasten your vanity. You can find studs by listening for a solid sound as you knock on the wall or by using a stud finder.
3. If your vanity cabinet has a solid back, mark and drill holes to accommodate drain pipes and supply pipes as necessary.
4. Place the vanity in the installation location. Verify that the vanity cabinet is level. If the vanity is not level, use vanity feet (if included) or wooden shims to adjust as necessary.
5. Attach the vanity to the wall by screwing through the mounting rail in the back of the vanity cabinet into the wall studs.
6. Install the integral sink/vanity top by applying a dot of silicone sealant on the corners of the vanity. Position the vanity top onto the vanity and press firmly into place. Wipe away any excess sealant with a damp cloth.

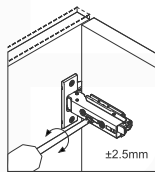

Note: We recommend consulting professional help if you are unfamiliar with installing bathroom vanities and/or plumbing.

How to Install a Levi Vanity | Remove / Install Drawers | Adjust Doors INSTALLATION GUIDE

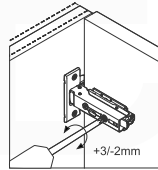

1. Determine your vanity placement and mark the area on the wall where it will be installed.
2. Locate and mark the location of the studs to which you will fasten your vanity. You can find studs by listening for a solid sound as you knock on the wall or by using a stud finder.
3. If your vanity cabinet has a solid back, mark and drill holes to accommodate drain pipes and supply pipes as necessary.
4. Mark the location of each of the wall mounting plates ensuring that they are positioned inside the sidewalls of the vanity unit. 
5. Place the vanity in the installation location. Verify that the vanity cabinet is level. If the vanity is not level, use vanity feet (if included) or wooden shims to adjust as necessary.
6. Install the integral sink/vanity top by applying a dot of silicone sealant on the corners of the vanity. Position the vanity top onto the vanity and press firmly into place. Wipe away any excess sealant with a damp cloth.

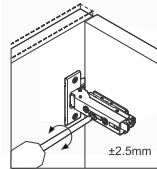

Note: We recommend consulting professional help if you are unfamiliar with installing bathroom vanities and/or plumbing.

Support wood bar

REMOVE THE COVER AND CONNECT TO THE POWER SUPPLY

The LED Driver inside the enclosed Icon mirror has already converted the electric to 110 volts. You can connect the wires that are coming out of the center of the back of the mirror directly to your electrical connection box. The Icon wires get connected to your 110 Volt electric box that you should have placed in the wall, behind where your Icon Mirror will be mounted. It doesn't have to be exactly in the center as the lead wire gives you flexibility in the placement. However we suggest you place it somewhere towards the center.

Freestanding Bathtub INSTALLATION AND CARE GUIDE

PREPARATION

1. Clean, level, and prepare the floor for installation.
2. Place the unit in the exact installed position on the floor and trace the outline of the bathtub with a pencil or any erasable marking.
3. Determine the location of the drain pipe, on the floor by taking measurements of the drain and waste location underneath the unit (figure 2).
4. Using a blanket, cardboard, or other clean protective surface, turn the unit on its side so that the unit is properly supported during drain installation.
5. Clean the drain hole area in preparation of setting the drain. The area should be dry and free of any debris.

INSTALL DRAIN HARDWARE

6. Apply plumbers putty around the Drain Body and pass it through the drain hole (figure 3).
7. Apply plumbers putty to the Washer and slide it over the bottom of the Drain Body (figure 3).
8. Slide the paper washer over the drain body.
9. Attach the Drain Body Nut on the Drain Body and tighten until the Nut and Washer have created a seal with the bottom of the bathtub. **DO NOT OVERTIGHTEN** (figure 4).

PREPARE TAIL PIECE

All parts involved in tail piece installation are provided by the installer.

10. Drain waste vent must always be installed according to local standard. Verify the placement of the bathtub before drilling the hole for the drain waste vent.
11. Install 1 1/2" rubber slip gasket over the drain waste vent (figure 5).
12. Cut tail piece to desired length (will vary for each installation).
13. Slide tail piece nut over tail piece towards flanged end.
14. Connect tail piece assembly to waste vent.
15. Place flange washer on top of tail piece.

INSTALL BATHTUB

17. Apply a generous bead of adhesive or silicone to the bottom of the tub legs (figure 6).
18. Then apply a bead of tub and tile caulk around the edge of the base (figure 6).
19. Carefully set tub into position (figure 7) and connect the drain hardware (previously installed). Finish the installation of the tail piece installation.

COMPLETE BATHTUB - INSTALLATION

20. Fill the tub with water to the overflow and then drain the tub while inspecting the waste connections below the floor for leaks. Access from below will be necessary for this step (figure 8).
21. With the bathtub now in place, wipe off any excess tub and tile caulk and adhesive where the tub meets the floor.
22. Run a bead of tub and tile caulk around the bottom edge of the bathtub where it meets the floor. Wipe off any excess caulk with a wet cloth (figure 9).

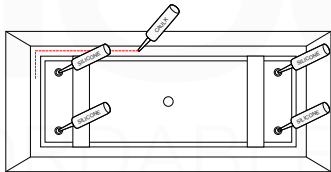

Figure 07

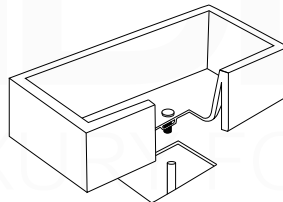

Figure 08

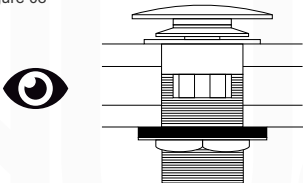

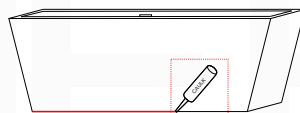

Figure 09

KubeBath Bathtubs are easy to clean: after each use, simply wipe with a soft cloth to remove any surface dirt. For day to day cleaning we recommend using of widely available mild soap cleaning product.

Never use petroleum-based products when cleaning, such as paint thinners or other solvents as they may damage the solid surface.

Note: Personal hygiene products and cosmetics will Not damage the surface.

Scratched or Damaged Surfaces:

Avoid using razor blades or other sharp objects that might scratch the surface. Most minor scratches (up to 1/64") and cigarette burns can be removed by sanding the area with #180 or #240 wet or dry sandpaper and progressing down to #600 or #1200 grit. Finally, apply a light buffing compound and buff area with a clean stitched cotton buffing pad or equivalent. Use an extra application of fine buffing compound if necessary.

LINEN SIDE CABINETS

wallmount

Bliss Bathroom Linen Side Cabinet

Bathroom storage cabinets can be stacked or mounted as a single cabinet on the bathroom wall. This type of storage cabinet can be filled with everything from towels to extra toiletries. Bliss Storage cabinets are often wall-mounted for convenience and ease of use.

Find the Correct Mounting Position

Using a stud finder, mark the location of the wall studs in the area where you want to hang your wall-mounted bathroom cabinet. Hanging your cabinet on wall studs will ensure that your cabinet will not collapse off of the wall when you place any heavier items in it. If the pre-drilled holes not match the wall studs, additional holes can be drilled on the Wood Bar or Linen Cabinet.

SHOWER SETS

aqua piazza & aqua rondo

Aqua Piazza Collection

shower sets

The Aqua Piazza Collection takes pure and simple geometric forms and composes them into an expression of modern luxury. The unapologetic angularity of the faucet is juxtaposed by a flow of water that is surprisingly laminar and gentle. Aqua Piazza is the product of an intimate cooperation between design and German Engineering.

FEATURES

- German Engineering Solid Brass Construction Valve
- Valve Installation with Threaded 1/2" MIP – No more Messy Welding!
- Valve with Plastic Protection Cover, Installation Level and Depth Indicator
- Super Slim Solid Brass 1pc Construction Shower Head – No Seams = No Leaks!
- Silicone Tips on Rain Shower and Handheld for Calcium Buildup – Easy to Clean
- Easily Control both Temperature and Water Volume with one Hand
- Depth Adjustable Cover Plates
- Triple Chromed for Durability and Longevity

Aqua Rondo Collection

shower sets

The Aqua Rondo Collection by KubeBath takes pure and simple geometric forms and composes them into an expression of modern luxury. The unapologetic angularity of the faucet is juxtaposed by a flow of water that is surprisingly laminar and gentle. Aqua Rondo is the product of an intimate cooperation between design and German Engineering.

FEATURES

- German Engineering Solid Brass Construction Valve
- Valve Installation with Thredded 1/2" MIP – No more Messy Welding!
- Valve with Plastic Protection Cover, Installation Level and Depth Indicator
- Super Slim Solid Brass 1pc Construction Shower Head – No Seams = No Leaks!
- Silicone Tips on both Rain Shower and Handheld for Calcium Buildup – Easy to Clean
- Easily Control both Temperature and Water Volume with one Hand
- Handheld Water Supply Adapter with Handheld Support – No Extra Holes on Your Tiles!
- Depth Adjustable Cover Plates
- Triple Chromed for Durability and Longevity

LINEAR DRAINS

shower equipment

LINEAR SHOWER DRAINS

KubeBath linear shower drain provides you the opportunity to design your bathroom exactly as you want it and offers unique design sets that are perfect for small and large-sized shower floors. With the modern and timeless design grates, you can personalize your shower sensation. Our linear shower drains are available in different lengths. In addition, all our linear shower drains are easy to clean and can be placed almost anywhere in the shower floor. The satin polished finish guarantees smooth surfaces, safe drainage, and high hygiene. They are handcrafted and highly resistant to temperature variations and easy to install in almost any kind of construction project.

COMPLETE SET INCLUDES

- Channel Body
- Stainless Steel Grate - chrome and matte black finish
- Filter Basket
- Drain Puller
- Waterproofing Membrane Sheet
- Installation Brackets With Adjustable Height

FEATURES

- All Grates and Channels are Available in 28", 36" and 48" Wide
- Stainless Steel Grate and Channel
- Adjustable Installation Brackets
- Grate can be Removed Completely for Cleaning
- 2" Outlet in the Center of Drain
- Flow rate 9 GPM per outlet*

*Flow rate measured at outlet only. Measurement does not account for water in channel or sheeting on shower floor.

CARE AND CLEANING OF YOUR DRAIN
Mild dishwashing liquids will keep the surfaces bright and clean. Rinse well and dry with a clean cloth.

Caution:

Powder detergent and liquid abrasive cleaners may damage surfaces. Do not allow visible surfaces to come into contact with corrosive products such as drain cleaners.

DO NOT USE:

- Cleaning agents that contains chlorides, alcohol, ammonia or mineral spirits.
- Steel wool, scouring pad or wire brushes.

AQUA ELEGANCE

Aqua Elegance Single Lever Faucet - Chrome / SKU#: AFB001

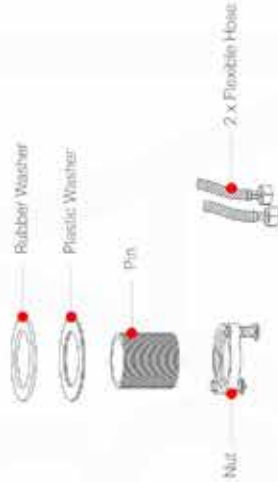

Features:

- Solid brass construction
- Single hole construction
- Ceramic disk cartridge
- Single lever faucet
- Standard plumbing connections
- Finish resist corrosion and tarnishing

Before Your Installation

Please make sure you have the following parts indicated below:

ASSEMBLY

1. Shut off water supply, remove old faucet and flexible hoses. Clean sink surface in preparation for the new faucet. Flush water connection at home to make sure no debris is stuck in the line.
2. Connect pin from the bottom of the faucet.
3. Connect flexible hoses to the brass pipes.
4. Place new faucet in the position on the sink, place brass ring between bottom of the faucet and sink surface. From under the sink, put rubber & plastic washer and thread nut onto the pin. Tighten nut.
5. Connect flexible hoses to the cold and hot water supply.
6. After installation is complete turn on the water supply valves and allow both hot and cold water to run at least one minute each, while water is running, check for leaks, especially at hook-ups to supply lines. Tightening nuts slightly will stop any minor leaks.

MAINTENANCE

Your new faucet is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will scratch, dull, and/or damage the finish and/or product void your warranty.

SAFETY TIPS

Be sure to shut off water supply prior to installation. Protect your eyes with safety glasses when cutting or soldering water supply lines. Cover your drain to avoid losing parts.

IMPORTANT POINTS

Prior to beginning installation, turn off the cold and hot water lines and open the hot and cold knobs on the old faucet to release build-up pressure. When installing your new faucet, turn the connector nuts finger-tight, then use one wrench to anchor the fitting and a second wrench to tighten the nut one additional turn. Connections that are too tight will reduce the integrity of the system. Wrap all threaded connections with Teflon tape available at your local hardware or plumbing supply store. Always wrap in a clockwise direction. All installations can vary depending on how your previous faucet was installed. Not all necessary supplies to install your faucet are included, however, they are available whenever plumbing supplies are sold.

We recommend installation to be done by qualified licensed plumber.

Prior to installation please read the instructions thoroughly, confirm that all parts are included and visually inspect the unit for any defects. If you have any questions please contact the Store Department before proceeding with installation.

AQUA ELEGANCE - AFB001

single lever bathroom vanity faucet

All Aqua Faucets by KubeBath are constructed in Solid Brass and feature a Ceramic Disk Cartridge. All of our Faucets Are cUPC Certified and go through a Multi-Stage Finish for Durability and Longevity.

- All Mounting Hardware Included
- Solid brass waterway construction
- Self-contained ceramic disk valve cartridge assures smooth both volume & temperature control
- Single-hole mounting
- Polished chrome finish resists corrosion and tarnishing
- 100% pressure system tested
- Flexible braided hoses for easy installation

AQUA RONDO

Aqua Rondo Single Hole Mount Bathroom Vanity Faucet - Chrome / SKU#: AFB033

ASSEMBLY

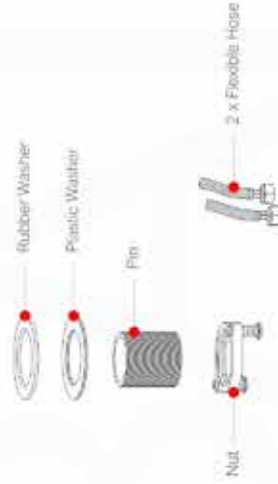

1. Shut off water supply, remove old faucet and flexible hoses, clean sink surface in preparation for the new faucet. Flush water connection at home to make sure no debris is stuck in the line.
2. Connect pin from the bottom of the faucet.
3. Connect flexible hoses to the brass pipes.
4. Place new faucet in the position on the sink, place brass ring between bottom of the faucet and sink surface. From under the sink, put rubber & plastic washer and thread nut onto the pin. Tighten nut.
5. Connect flexible hoses to the cold and hot water supply.
6. After installation is complete turn on the water supply valves and allow both hot and cold water to run at least one minute each, while water is running, check for leaks, especially at hook-ups to supply lines. Tightening nuts slightly will stop any minor leaks.

Features:

- Solid brass construction
- Single hole construction
- Ceramic disk cartridge
- Single lever faucet
- Standard plumbing connections
- Finish resist corrosion and tarnishing

Before Your Installation

Please make sure you have the following parts indicated below:

MAINTENANCE

Your new faucet is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will scratch, dull, and/or damage the finish and/or product void your warranty.

SAFETY TIPS

- Be sure to shut off water supply prior to installation.
- Protect your eyes with safety glasses when cutting or soldering water supply lines.
- Cover your drain to avoid losing parts.

IMPORTANT POINTS

Prior to beginning installation, turn off the cold and hot water lines and open the hot and cold knobs on the old faucet to release build-up pressure. When installing your new faucet, turn the connector nuts finger-tight, then use one wrench to anchor the fitting, and a second wrench to tighten the nut one additional turn. Connections that are too tight will reduce the integrity of the system. Wrap all threaded connections with Teflon tape available at your local hardware or plumbing supply store. Always wrap in a clockwise direction. All installers can vary depending on how your previous faucet was installed. Not all necessary supplies to install your faucet are included, however, they are available wherever plumbing supplies are sold.

We recommend installation to be done by qualified licensed plumber. Prior to installation please read the instructions thoroughly, confirm that all parts are included, and visually inspect the unit for any defects. If you have any questions please contact the Store Department before proceeding with installation.

All Aqua Faucets by KubeBath are constructed in Solid Brass and feature a Ceramic Disk Cartridge. All of our Faucets Are cUPC Certified and go through a Multi-Stage Finish for Durability and Longevity.

AVAILABLE FINISH

 **Chrome**
SKU: AFB10901

FEATURES

- Single Lever Polished Chrome Faucet
- All Mounting Hardware Included
- Solid brass waterway construction
- Self-contained ceramic disk valve cartridge assures smooth both volume & temperature control
- Single-hole mounting
- Polished chrome finish resists corrosion and tarnishing
- 100% pressure system tested
- Flexible braided hoses for easy installation

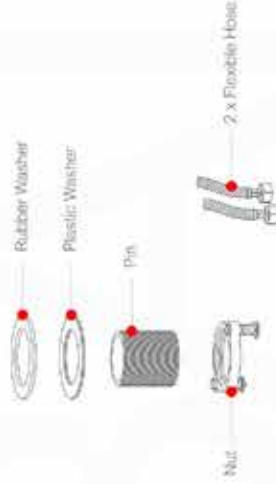

Features:

- Solid brass construction
- Single hole construction
- Ceramic disk cartridge
- Single lever faucet
- Standard plumbing connections
- Finish resist corrosion and tarnishing

Before Your Installation

Please make sure you have the following parts indicated below:

ASSEMBLY

1. Shut off water supply, remove old faucet and flexible hoses, clean sink surface in preparation for the new faucet. Flush water connection at home to make sure no debris is stuck in the line.
2. Connect pin from the bottom of the faucet.
3. Connect flexible hoses to the brass pipes.
4. Place new faucet in the position on the sink, place brass ring between bottom of the faucet and sink surface. From under the sink, put rubber & plastic washer and thread nut onto the pin. Tighten nut.
5. Connect flexible hoses to the cold and hot water supply.
6. After installation is complete turn on the water supply valves and allow both hot and cold water to run at least one minute each, while water is running, check for leaks, especially at hook-ups to supply lines. Tightening nuts slightly will stop any minor leaks.

MAINTENANCE

Your new faucet is designed for years of trouble-free performance. Keep it looking new by cleaning it periodically with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will scratch, dull, and/or damage the finish and/or product void your warranty.

SAFETY TIPS

- Be sure to shut off water supply prior to installation.
- Protect your eyes with safety glasses when cutting or soldering water supply lines.
- Cover your drain to avoid losing parts.

IMPORTANT POINTS

Prior to beginning installation, turn off the cold and hot water lines and open the hot and cold knobs on the old faucet to release build-up pressure. When installing your new faucet, turn the connector nuts finger-tight, then use one wrench to anchor the fitting and a second wrench to tighten the nut one additional turn. Connections that are too tight will reduce the integrity of the system. Wrap all threaded connections with Teflon tape available at your local hardware or plumbing supply store. Always wrap in a clockwise direction. All installations can vary depending on how your previous faucet was installed. Not all necessary supplies to install your faucet are included, however, they are available whenever plumbing supplies are sold.

We recommend installation to be done by qualified licensed plumber.

Prior to installation please read the instructions thoroughly, confirm that all parts are included and visually inspect the unit for any defects. If you have any questions please contact the Store Department before proceeding with installation.

AQUA LOFT

Aqua Single Lever Faucet / SKU: AFB004

INSTALLATION STEPS

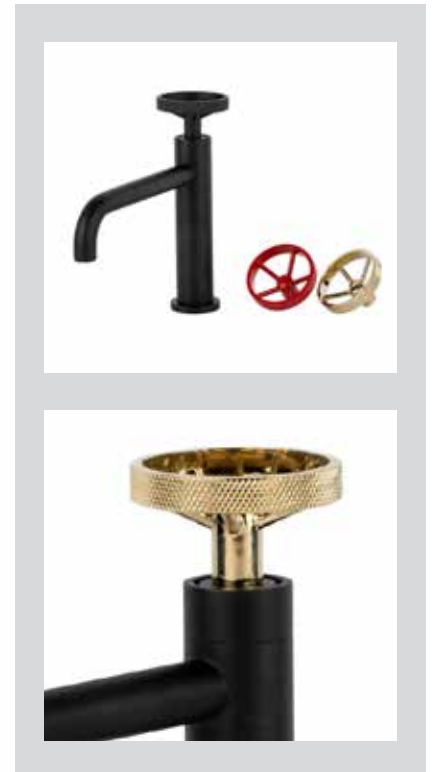

NOTES BEFORE INSTALLATION

- Please check that all components are present.
- Before installation, ensure that all feed lines are clear of debris and on/off valve is present.
- Ensure water pressure is between 20-125PSI (includes combination of hot and cold feed lines).
- Pictures in the manual are general in content and do not represent exactly your purchased faucet. If you are having difficulties, please contact a professional plumber.
- If you will be away from home for an extended period, you should shut off the main water supply.

DAILY MAINTENANCE

- Use a soft cloth and vinegar to remove hard-water spots.
- Check aerator (if present) regularly for calcium buildup when water stream is not optimum.
- DO NOT use caustic cleaning products as the use will break down finish and will void product warranty.
- Acceptable cleansers include vinegar or mild non-abrasive liquid detergents.
- If the water pressure appears to be less optimum, remove, inspect, or replace aerator.

AQUA LOFT - AFB004
